Statistics is a branch of mathematics working with data collection, organization, analysis, interpretation and presentation. In applying statistics to, for example, a scientific, industrial, or social problem, it is conventional to begin with a statistical population or a statistical model process to be studied. Populations can be diverse topics such as "all people living in a country" or ...

Entering Data A new worksheet is a grid of rows and columns. The rows are labeled with numbers, and the columns are labeled with letters. Each intersection of a row and a column is a cell. Each cell has an address, which is the column letter and the row number. The arrow on the worksheet to the right points to cell A1, which is currently highlighted, indicating that it is an active cell.

Excel for Business Statistics - ubalt.edu

Hi Lei, You can simply make up the numbers for two samples and run the t test as described on the website to get the solutions. This is a reasonable approach unless you need real data from a real study, in which you could find these by googling, although, as you probably know, there is a lot of work involved to find suitable examples.

The Generalized Extreme Studentized Deviate (ESD) Test is a generalization of Grubbs' Test and handles more than one outlier. All you need to do is provide an upper bound on the number of potential outliers. We test the null hypothesis that the data has no outliers vs. the alternative hypothesis that there are at most k outliers (for some user specified value of k).
