Samsung CHG90: What it's like playing games on the world's ...

The performance of a monitor is usually determined by a number of factors and not just one feature like its overall screen size, for example. Some of these include the aspect ratio (horizontal length against the vertical length), power consumption, refresh rate, contrast ratio (ratio of the brightest colors vs the darkest colors), response time (the time it takes a pixel to go from active, to ...

Samsung Galaxy Tab 10.1 Display Shoot-Out

How an image is rendered on a progressive display vs. an interlaced display. As people moved away from the older CRT displays, the terminology changed from refresh rate to frame rate, because of the difference in the way the LED monitor works. The frame rate is the speed with which the monitor displays each separate frame of data. The most recent versions of Windows set the framerate at 60 ...
