It's roughly what you dependence currently. This solution galvin operating system 8th edition, as one of the most functioning sellers here will extremely be among the best options to review.

Solution Galvin Operating System 8th

The kernel is a computer program that is the core of a computer's operating system, with complete control over everything in the system. On most systems, it is one of the first programs loaded on start-up (after the bootloader). It handles the rest of start-up as well as input/output requests from software, translating them into data-processing instructions for the central processing unit.

Kernel (operating system) - Wikipedia

Round-robin (RR) is one of the algorithms employed by process and network schedulers in computing. As the term is generally used, time slices (also known as time quanta) are assigned to each process in equal portions and in circular order, handling all processes without priority (also known as cyclic executive). Round-robin scheduling is simple, easy to implement, and starvation-free.

Round-robin scheduling - Wikipedia
