Uniform electric fields This is the most common type of electric field in HSC Physics questions. It is also the easiest to work with, as the field lines are always parallel straight lines (between the plates) and their density is evenly distributed in that region, which means that the strength of the electric field between the two plates is also constant.

The Higgs boson is an elementary particle in the Standard Model of particle physics, produced by the quantum excitation of the Higgs field, one of the fields in particle physics theory. It is named after physicist Peter Higgs, who in 1964, along with five other scientists, proposed the mechanism which suggested the existence of such a particle. Its existence was confirmed in 2012 by the ATLAS ...
