By Chloe Hutchings-Hay, Analyst at Ogilvy Consulting's Behavioural Science Practice. When people think of disasters, the common image is one of social breakdown, panic and irrational behaviour. It has also been suggested that people become hostile and take aggressive action towards others when faced with a disaster. This is in line with the ideas of Le Bon who suggested that submergence in ...

New Rochelle High School forensic science students had just learned about DNA evidence. Yesterday, they and some schoolmates gained perspective on the topic they could never get from science studies alone, when they heard the harrowing first-hand account of man wrongfully imprisoned for 16 years before DNA evidence proved that someone else committed the crime.
