Chirality / k aɪˈr æ l ɪ t iː / is a property of asymmetry important in several branches of science. The word chirality is derived from the Greek χείρ (kheir), "hand," a familiar chiral object.. An object or a system is chiral if it is distinguishable from its mirror image; that is, it cannot be superposed onto it. Conversely, a mirror image of an achiral object, such as a sphere ...

Nitrous acid is useful for destroying sodium azide solutions, which are toxic and potentially explosive. It can also be used to prepare diazonium salts, which combine with anilines and phenols to form brightly colored azo compounds. The latter type of reaction can be used to produce azo-dyes, as well as serving as a qualitative test for aromatic amines.
