Actualy when i run tests they fails but i need to run them to get some .class files which are very important for my jar. By default when test results fails , the jar is not build , could i add a setting in pom.xml which ignore that, so I can build the jar ignoring results from tests ?

How to build a jar using maven, ignoring test results?

I have done your paragraph 2 and 3 to no effect. I'm sure the suggestions work it's just that they had no effect - it behaves like there's another log4j.properties file in the classpath. But I can't see it anywhere. If I remove my log4j properties file altogether I don't get the "you must configure log4j warning" in the console.

java - Add a properties file to IntelliJ's classpath ...

Intel Active Management Technology (AMT) is hardware and firmware technology for remote out-of-band management of personal computers, running on the Intel Management Engine, a separate microprocessor not exposed to the user, in order to monitor, maintain, update, upgrade, and repair them. Out-of-band (OOB) or hardware-based management is different from software-based (or in-band) management ...
