The problem here is not with Fortran, in fact it is not a problem at all. This is just a feature of floating-point arithmetic. If you think about how you would represent 23.234 as a 'single float' in binary, you would see that the number has to be saved to only so many decimals of precision.

Precision problems of real numbers in Fortran - Stack Overflow

This interference happens chiefly if you take thyroid hormone replacement and calcium supplements at or near the same time. You can avoid this problem with the following steps:

Hypothyroidism: Can calcium supplements interfere with ...

BEST ANSWER: It depends on what you mean by "regular" door.? If you have an inset door, then yes you can as the latch needs to be able to be depressed inward to release the mechanism. But if you have an overlay door Rockler's sells a barrel type magnetic latch/catch that would be better suited for your application.
