my.hrw.com

I did a Separation Lab in Chemistry (and apparently it's a common lab), and I had to separate iron, sand, salt, and potassium nitrate from each other. There were unknown amounts of each substance in the mixture. I measured the beginning mass and then after I finished the lab, I added all of the masses of the separated substances. However, I wasn't missing mass like you would think (you ...

Separating Mixtures Lab, Places for Error? | Yahoo Answers

This lab was the separation of the components of a Binary mixture. The three objectives in this lab were: 1. Learn the different separation techniques which include; sublimation, extraction, decantation, filtration and evaporation. 2. Separate two components in a mixture using the separation techniques learned. 3.
