Elementary algebra encompasses some of the basic concepts of algebra, one of the main branches of mathematics. It is typically taught to secondary school students and builds on their understanding of arithmetic. Whereas arithmetic deals with specified numbers, algebra introduces quantities without fixed values, known as variables. This use of variables entails a use of algebraic notation and an ...

Terminology note: We are using $P(x)$ (with a capital P) to denote the cumulative probability distribution function. Specifically, $P(x)$ is the total amount of probability measure to the left of x . The probability density is then dP/dx . I am aware that many people think of the probability density (as shown in figure 2) as the probability, and denote it by P or p .
