Astronomy Ch. 3 Flashcards | Quizlet

The idea of placing the sun at the center of the universe was not a particularly new one. But few either saw advantage to it and many considered it physically impossible (it was inconsistent with Aristotelian physics).

Heliocentrism - Solar System Models - NAAP

Mars is the fourth planet from the Sun and the second-smallest planet in the Solar System after Mercury. In English, Mars carries a name of the Roman god of war, and is often referred to as the "Red Planet" because the iron oxide prevalent on its surface gives it a reddish appearance that is distinctive among the astronomical bodies visible to the naked eye.

Europa (/ j ʊəˈr ɒ p ə / yoor-OH-pə) (Jupiter II) is the smallest of the four Galilean moons orbiting Jupiter, and the sixth-closest to the planet of all the 79 known moons of Jupiter. It is also the sixth-largest moon in the Solar System. Europa was discovered in 1610 by Galileo Galilei and was named after Europa, the Phoenician mother of King Minos of Crete and lover of Zeus (the Greek ...

RETROGRADE PLANETS in NATAL HOUSES:. NOTE: These are my notes from a lecture I gave on Retrogrades in Pisa, Italy. I have given this lecture so many times that I do not want to give it again...so I am sharing my notes with everyone. All of the planets, with the exception of the Sun and Moon which are not actual planets, have a period of retrogradation.

Thirdly communication gear, perhaps even with something like a Morse code key for use when radio interference becomes a problem (If this was a Metalunan ship, this is where you'd find the interociter).. There might be a separate communications deck, which is generally called a "radio shack", crewed by a communication officer whose nickname is "Sparks."

Astrogation Deck - Atomic Rockets

As the delta-V for a mission goes up, the amount of propellant required goes up exponentially (or looking at it another way: the amount of payload shrinks exponentially). Large amounts of propellant are expensive, but the higher the mass-ratio the higher the likelihood that the spacecraft will not be reusable.

Infrastructure - Atomic Rockets

The Beginning of Modern Science. I expect a terrible rebuke from one of my adversaries, and I can almost hear him shouting in my ears that it is one thing to deal with matters physically and quite another to do so mathematically, and that geometers should stick to their fantasies, and not get involved in philosophical matters where the conclusions are different from those in mathematics.
