Smallpox was the first and only human disease to be eradicated. How far are we from the eradication of other human diseases - polio, HIV/AIDS, malaria or tuberculosis? See global and country-level data on cases, deaths and treatment of diseases.

**Eradication of Diseases - Our World in Data**

A pulmonary alveolus (plural: alveoli, from Latin alveolus, "little cavity") is a hollow cavity found in the lung parenchyma, and is the basic unit of ventilation. Lung alveoli are the ends of the respiratory tree, branching from either alveolar sacs or alveolar ducts, which like alveoli are both sites of gas exchange with the blood as well. Alveoli are particular to mammalian lungs.

Infection is the invasion of an organism's body tissues by disease-causing agents, their multiplication, and the reaction of host tissues to the infectious agents and the toxins they produce. Infectious disease, also known as transmissible disease or communicable disease, is illness resulting from an infection.. Infections are caused by infectious agents including:

**Infection - Wikipedia**

Influenza was discovered not by a direct study of the disease in humans, but rather from studies on animal diseases. In 1918, J.S. Koen, a veterinarian, observed a disease in pigs which was believed to be the same disease as the now famous "Spanish" influenza pandemic of 1918.

With regard to fully harvesting the potential of big data, public health lags behind other fields. To determine this potential, we applied big data (air passenger volume from international areas with active chikungunya transmission, Twitter data, and vectorial capacity estimates of Aedes albopictus mosquitoes) to the 2017 chikungunya outbreaks in Europe to assess the risks for virus ...

Uncombable hair syndrome (UHS) may first become apparent any time between the ages of 3 months and 12 years. It only affects the scalp hair. The quantity of hair remains normal, but the hair often grows slowly. Over time the hair becomes progressively silvery-blond or straw-colored; dry and disordered (standing out and growing in different directions); and unmanageable to comb flat.
