Ellipse as a locus. The ellipse is defined as the locus of a point (x,y) which moves so that the sum of its distances from two fixed points (called foci, or focuses) is constant.. We can produce an ellipse by pinning the ends of a piece of string and keeping a pencil tightly within the boundary of the string, as follows.

5. The Ellipse - Interactive Mathematics

I went to start the archive process for a user today, only to find the option greyed out. It eventually went through autoarchive, but the user would like to have more control over the frequency and thoroughness of the archive.

The foot is three interrelated complexes, forefoot, midfoot and rear foot. All or any of these may need correction. And correction of one part has an influence on the others. I track this kind of stuff and find that a need for forefoot correction is not rare but not common either, whereas midfoot and rear foot correction is needed by something over 95 percent of the cycling population.

Nature and influence of the problems. Hilbert's problems ranged greatly in topic and precision. Some of them are propounded precisely enough to enable a clear affirmative or negative answer, like the 3rd problem, which was the first to be solved, or the 8th problem (the Riemann hypothesis). For other problems, such as the 5th, experts have traditionally agreed on a single interpretation, and a ...

Hilbert's problems - Wikipedia

The Jargon File contains a bunch of definitions of the term 'hacker', most having to do with technical adeptness and a delight in solving problems and overcoming limits. If you want to know how to become a hacker, though, only two are really relevant. There is a community, a shared culture, of expert programmers and networking wizards that traces its history back through decades to the ...

A column or pillar in architecture and structural engineering is a structural element that transmits, through compression, the weight of the structure above to other structural elements below. In other words, a column is a compression member. The term column applies especially to a large round support (the shaft of the column) with a capital and a base or pedestal which is made of stone, or ...
