Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

A "general statement" "intended to develop a unified conceptual scheme for theory and research in the social sciences" was published by nine USA social scientists in 1951. Theory was to be based on a "theory of action" in which "the point of reference of all terms is the action of an individual actor or collective of actors".
