The word "fractal" often has different connotations for laymen as opposed to mathematicians, where the layman is more likely to be familiar with fractal art than the mathematical concept. The mathematical concept is difficult to define formally, even for mathematicians, but key features can be understood with little mathematical background.

Please, James, that is the same old tired slayer argument. Yes, the ultimate *source* of energy is the sun. But if the total *downward* energy flux was only 300 W/m², then the temperature would never rise above about 35 deg. F (assuming an infrared emissivity of 0.9)...even colder if you assume convective losses.
