Essential thrombocythemia (ET) is a chronic myeloproliferative neoplasm (MPN) that primarily involves the megakaryocytic lineage. It is characterized by sustained thrombocytosis in the peripheral blood and increased numbers of large, mature megakaryocytes in the bone marrow and clinically by the occurrence of thrombocytosis and/or hemorrhage. Because there is no known genetic or biological ...

Do Now: Students walk into class with this problem on the projection screen: In a liter of human blood there are 9 grams of salt.What is the NaCl molarity of human blood? Fun fact: adult bodies contain about 5 liters of blood. I reason this is a good warm-up activity because it recaptures the work with molarity that students have been working on over the past two classes, and molarity is a key ...

Making inferences is a skill with which students often need much practice. If you've looked for resources in the same places that I have, you probably haven't been too happy with what you found. I believe that the inference worksheets that I've created are of a higher quality than the

other available resources and, as usual, I'm giving them away for free.
