A vector space (also called a linear space) is a collection of objects called vectors, which may be added together and multiplied ("scaled") by numbers, called scalars. Scalars are often taken to be real numbers, but there are also vector spaces with scalar multiplication by complex numbers, rational numbers, or generally any field. The operations of vector addition and scalar multiplication ...

fits the bill. Note that the vector potential is parallel to the direction of the current. This would seem

to suggest that there is a more direct relationship between the vector potential and the current than there is between the magnetic field and the current.
