Botany originated as herbalism, the study and use of plants for their medicinal properties. Many records of the Holocene period date early botanical knowledge as far back as 10,000 years ago. This early unrecorded knowledge of plants was discovered in ancient sites of human occupation within Tennessee, which make up much of the Cherokee land today. The early recorded history of botany includes ...

1. Background. Modern exploration of the deep sea began in the mid-19th century during an era of expanding transocean communication and scientific curiosity regarding marine geology and natural history (Wüst, 1964; Rozwadowski, 2001). However, comprehensive study of our oceans, especially deeper regions, has only recently accelerated with the advent of underwater intervention technology.

Ecology is the study of the intricate relationships between organisms and their environment. In order to develop a creation model of ecology, the foundation must be based on sound biblical presuppositions, beginning with the assumption that there is a Creator who desires to be known in word and deed.
