It's approximately what you craving currently. This solution description site directory for sharepoint 2010, as one of the most enthusiastic sellers here will totally be in the midst of the best options to review.*

### **Solution Description Site Directory For**

I couldn't find a solution file for my project. I was able to run the project on one machine without a .sln in the project. The reason it worked on the machine I created it on was that that I keep my VS projects under C:\Dev\Projects but Visual Studio kept its .sln file c:\users\xyz\documents\VisualStudio2015\projects directory.

Having worked in help-desk roles in the past I know the importance of knowing which user has logged onto which computer. Its simple stuff really, but unless you have 3rd party systems like System Center 2012 (SC12) or client agents, its either hard or time consuming to find out the relation between users and computers.
