It is a common question asked by many users that what exactly we mean by SharePoint Farm? The answer is. A SharePoint Farm is a collection of all those SharePoint servers that share the same SharePoint configuration database.. By Default, configuration database name is SharePoint_Config.

SharePoint Insight

SharePoint 2007 has no inherit List-in-List support, however... You can have multiple Sites (really Webs) in a given Site Collection in SP2007 and Sites (really Webs) can have sub-Sites (really child Webs). This can used to simulate the above "List-in-List". The approach may not be ideal, but isn't too hard to work with for some tasks if all the Sites (really Webs) are in the same Site ...

How to create sub-lists in sharepoint - Stack Overflow

Got it figured out. I had renamed the "Project Type" column, even though it changed in SharePoint, the ID didn't. To check that, I clicked F12 for the developer tools, searched "Photo Type" and found that the name was actually "Photo Type Required Field".

Introduction to lists - SharePoint - support.office.com

Advantages of Site Collections. Provisioning a site collection can be limited to a select group of users in your organization. I believe this is a governance advantage as it gives you an opportunity to control site collections being provisioned, provide the appropriate guidance and training and implement the required controls (protection, retention) for the site collection.
