In chemistry, resonance is a way of describing bonding in certain molecules or ions by the combination of several contributing structures (or forms, also variously known as resonance structures or canonical structures) into a resonance hybrid (or hybrid structure) in valence bond theory. It has particular value for describing delocalized electrons within certain molecules or polyatomic ions ...

Resonance (chemistry) - Wikipedia

This article is based on our personal experience and is our personal perspective from our careers in a big pharma company. Some points made will be unique to GSK and to the UK and we recognise that drug discovery also takes place in biotechs, academia and in non-profit institutions inter alia and certain points will not apply in these situations. But we hope most points capture practices and ...
