$\triangle ABC$ is an equilateral triangle with side 6. Equilateral triangles have sides of all equal length and angles of 60° . To find the area, we can first find the height. To find the height, we can draw an altitude to one of the sides in order to split the triangle into two equal 30-60-90 triangles. Now ...

Most people have thirty two permanent teeth that develop in their mouths. Failure of any these teeth to fully develop is called congenitally missing teeth or, in scientific terms, hypodontia. Congenitally missing teeth is actually one of the most common dental developmental abnormalities, even more common than double teeth and having an extra tooth.
