The length of a link segment (e) is one of the key parameters that controls the stiffness, strength, ductility, and behavior of an EBF system. The link length ratio, $\rho = e / (M_P / V_P)$, where M_P and V_P are the plastic moment and plastic shear capacities of the link, provides a convenient measure for the yield behavior. The free-body diagram of an isolated link is shown in Fig. 2.

Wingsuit flying (or wingsuiting) is the sport of flying through the air using a wingsuit which adds surface area to the human body to enable a significant increase in lift. The modern wingsuit, first developed in the late 1990s, creates a surface area with fabric between the legs and under the arms.

Radar is a detection system that uses radio waves to determine the range, angle, or velocity of objects. It can be used to detect aircraft, ships, spacecraft, guided missiles, motor vehicles, weather formations, and terrain. A radar system consists of a transmitter producing electromagnetic waves in the radio or microwaves domain, a transmitting antenna, a receiving antenna (often the same ...

The open nature of the RISC-V ecosystem has allowed contributions from both academia and industry leading to an unprecedented number of new hardware design proposals in a very short time span. Linux support is the key to enabling these new hardware options. Since last year's Plumbers, many kernel features were added to RISC-V. To name a few, we now have out-of-box 32-bit and eBPF support ...

One of the trickiest things about redeeming miles is accurately searching award space. You have to know where to search for it, the foibles of each search engine, and that's before you even get into the thick of what partners each airline has and the corresponding routing rules.. It can be a lot. Of course, we all build that knowledge up over time, or can research for a particular trip, but ...
