A good understanding of Colorado's physical history and rocks requires a feel for large-scale geodynamics. This groundwork article attempts to provide just that context while supporting the photojournals and other groundwork articles that draw on such ideas.. Most importantly, this article seeks to provide a basis for appreciating if not answering the \$64,000 geo-question about Colorado:

The Earth At Work

What causes the fresh smell we experience just before the onset of a storm or shower of rain, which is especially noticeable after an extended dry spell?

A ciénega (also spelled cienaga) is a wetland system unique to the American Southwest.Ciénegas are alkaline, freshwater, spongy, wet meadows with shallow-gradient, permanently saturated soils in otherwise arid landscapes that often occupied nearly the entire widths of valley bottoms.That description satisfies historic, pre-damaged ciénegas, although few can be described that way now.

Ciénega - Wikipedia

John Keats was born in London on 31 October 1795, the eldest of Thomas and Frances Jennings Keats's four children. Although he died at the age of twenty-five, Keats had perhaps the most remarkable career of any English poet. He published only fifty-four poems, in three slim volumes and a few magazines. But over his short development he took on the challenges of a wide range of poetic forms ...

Oceanographer Walter Munk in 1963 with a tide capsule, which was dropped to the sea floor to measure deep-sea tides. Credit: Ansel Adams, University of California

Walter Munk (1917-2019)

Plate tectonics is the geologic theory that Earth's crust is made up of rigid plates that "float" on the surface of the planet. Tectonics comes from the Greek word meaning "builder."

Plate Tectonics - examples, body, process, Earth, type ...

The cetacean skeleton is largely made up of cortical bone, which stabilizes the animal in the water. For this reason, the usual terrestrial compact bones, which are finely woven cancellous bone, are replaced with lighter and more elastic material. In many places, bone elements are replaced by cartilage and even fat, thereby improving their hydrostatic qualities.
