Nitrogen, oxides of (EHC 188, 1997, 2nd edition) - INCHEM

The infraorbital nerve block is often used to accomplish regional anesthesia of the face. The procedure offers several advantages over local tissue infiltration. A nerve block often achieves anesthesia with a smaller amount of medication than is required for local infiltration. In addition, unlike ...

A process in which heat does not enter or leave a system. In the atmospheric sciences, adiabatic processes are often used to model internal energy changes in rising and descending parcels of air in the atmosphere. When a parcel of air rises it expands because of a reduction in pressure.

In thermodynamics the entropy of mixing is the increase in the total entropy when several initially separate systems of different composition, each in a thermodynamic state of internal equilibrium, are mixed without chemical reaction by the thermodynamic operation of removal of impermeable partition(s) between them, followed by a time for establishment of a new thermodynamic state of internal ...

In computer science, iterative deepening search or more specifically iterative deepening depth-first search (IDS or IDDFS) is a state space/graph search strategy in which a depth-limited version of depth-first search is run repeatedly with increasing depth limits until the goal is found. IDDFS is optimal like breadth-first search, but uses much less memory; at each iteration, it visits the ...

There are 100 doors in a row that are all initially closed. You make 100 passes by the doors.. The first time through, visit every door and toggle the door (if the door is closed, open it; if it is open, close it). The second time, only visit every 2 nd door (door #2, #4, #6, ...), and toggle it.. The third time, visit every 3 rd door (door #3, #6, #9, ...), etc, until you only visit the 100 ...

100 doors - Rosetta Code

A discussion main models on the spontaneous origin of life that aims to show how cellular complexity could have gradually emerged from simple systems – in contrast to the sudden appearance of complexity that creationists claim to have been necessary at the beginning of life. Central issues like the composition of the early atmosphere of the Earth and the origin of the homochirality of amino ...

Esophagogastroduodenoscopy (EGD) is a procedure during which a small flexible endoscope is introduced through the mouth (or with smaller caliber endoscopes, through the nose) and advanced through the pharynx, esophagus, stomach, and duodenum. An enteroscope, a longer endoscope, can be introduced beyond the ligament of Treitz into the jejunum.
