In "Learning the Depths of Moving People by Watching Frozen People", we tackle this fundamental challenge by applying a deep learning-based approach that can generate depth maps from an ordinary video, where both the camera and subjects are freely moving. The model avoids direct 3D triangulation by learning priors on human pose and shape from data.

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...
