This film describes natural selection and adaptation in populations of rock pocket mice living in the American Southwest. Mice living on light-colored sand tend to have light-colored coats, while mice living on patches of dark-colored rock have mostly dark-colored coats. Dr. Michael Nachman studies ...

The Making of the Fittest: Natural Selection and Adaptation

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.
