A cyclorotor, cycloidal rotor, cycloidal propeller or cyclogiro, is a fluid propulsion device that converts shaft power into the acceleration of a fluid using a rotating axis perpendicular to the direction of fluid motion. It uses several blades with a spanwise axis parallel to the axis of rotation and perpendicular to the direction of fluid motion. These blades are cyclically pitched twice per ...

Introduction. Targeted protein degradation — a marriage of precision chemistry with powerful

cellular enzymatic machinery — has rapidly emerged as a high-potential prospect for new small molecule therapeutics [1 •,2,3,4 •]. These small molecules, canonically called degraders in light of their overall effect, cause degradation of a target protein by catalyzing the specific ubiquitination ...

Abstract. Motivation: Survival analysis methods that integrate pathways/gene sets into their learning model could identify molecular mechanisms that determine survival characteristics of patients. Rather than first picking the predictive pathways/gene sets from a given collection and then training a predictive model on the subset of genomic features mapped to these selected pathways/gene sets ...
