In physiology, an action potential occurs when the membrane potential of a specific axon location rapidly rises and falls: this depolarisation then causes adjacent locations to similarly depolarise. Action potentials occur in several types of animal cells, called excitable cells, which include neurons, muscle cells, endocrine cells, glomus cells, and in some plant cells.

Ultra was the designation adopted by British military intelligence in June 1941 for wartime signals intelligence obtained by breaking high-level encrypted enemy radio and teleprinter communications at the Government Code and Cypher School (GC&CS) at Bletchley Park. Ultra eventually became the standard designation among the western Allies for all such intelligence.

The primary purpose of a controller class is to encapsulate controller code. A complex application might have multiple controllers for different subcomponents, or layers, of the application. In Qt, the base class for a variety of controller classes is QAbstractItemDelegate. Code that connects signals to slots can also be considered controller code. As you will see, keeping controller code out of ...

You are right about those folks you speak of, NFO, but that is because they come from a similar culture to you. When I worked for the California Highway Patrol in far-northern CA (just south of the Oregon state line), most of our guys wouldn't go along with the enforcement of a total gun ban, and the Sheriff of our county (Siskiyou) even stated in public that he would not enforce any new gun ...

User experience signals were HUGE this year. And I expect them to be an even more important SEO trend in 2019. In fact, Google previously announced that RankBrain was their third most important ranking factor: "In the few months it has been deployed, RankBrain has become the third-most important signal contributing to the result of a search query."
