Solution: ApneBoot is a foot-wearable device to alert for bradycardia and hypoxia, key symptom of neonatal apnea. Further, ApneBoot resolves episodes of apnea of prematurity or central apneas and prolonged hypoxia episodes in premature newborns through an instantaneous tactile stimulation to the foot sole.

Innovative technology - empowering people. Network

Collaborative innovation is a process in which multiple players (within and outside an organization) contribute towards creating and developing new products, services, policies, processes, or business solutions. It might include the involvement of customers, suppliers and multiple stakeholders such as agencies and consultants. Usually, firms that promote open forms of collaboration benefit ...

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.

I 've been a big fan of ElasticSearch the since last Spring - using it on my RiffBank project as well as various other "data collection" experiments. Put (very) simply, it's a badass search server based on Apache Lucene. But in all honestly, to me, it's really a very scalable, auto-balancing, redundant, NoSQL data-store with all the benefits of a full search and analytics server.
