A space station is basically a spacecraft with no propulsion. Which boils down to just the habitat module and the payload. Like any other living system, the internal operations of a space station can be analyzed with Living Systems Theory, to discover sources of interesting plot complications.. Much like spacecraft, in a science fiction story a space station can become a character all by ...

The International Space Station (ISS) is a space station, or a habitable artificial satellite, in low Earth orbit. Its first component was launched into orbit in 1998, with the first long-term residents arriving in November 2000. It has been inhabited continuously since that date. The last pressurised module was fitted in 2011, and an experimental inflatable space habitat was added in 2016.

Hi Deep Climate, I don't think the Cowtan and Way uncertainty envelope covers all the uncertainties that the HadCRUT4 envelope covers. They have a reduced coverage uncertainty due to the kriging, but as far as I know (happy to be corrected, I know their data set is in a state of continual improvement), they don't propagate all the uncertainties in the HadCRUT4 gridded data through their ...

ThinkPad is a line of business-oriented laptop computers and tablets designed, developed, and sold by Lenovo, and formerly IBM. ThinkPads are known for their minimalist, black, and boxy design which was initially modeled in 1990 by industrial designer Richard Sapper, based on the concept of a traditional Japanese Bento lunchbox revealing its nature only after being opened.

This established the first strong link between early cognitive development and the functions of a specific brain region. That gave encouragement to others that rigorous experimental work addressing brain-behavior relations was possible in infants. It also fundamentally altered the scientific understanding of PFC early in development; clearly it was not silent as accepted wisdom had held.
