In a recent PNAS publication CMMB Associate Professor Gary Daughdrill, in collaboration with Professor Jiandong Chen at the Moffitt Cancer Center, investigated how levels of disorder in the p53 tumor suppressor regulate auto-inhibition of DNA binding (10.1073/pnas.1903077116). The p53 tumor suppressor is a sequence-specific DNA binding protein that activates gene transcription to regulate cell ...

Postmedia Solutions gives you the power to grow your business. We blend media expertise with smart marketing. It's the perfect balance of creativity and science to propel brand awareness, engagement, conversion and loyalty.

### **Postmedia Solutions**

A genetically modified organism (GMO) is any organism whose genetic material has been altered using genetic engineering techniques. The exact definition of a genetically modified organism and what constitutes genetic engineering varies, with the most common being an organism altered in a way that "does not occur naturally by mating and/or natural recombination".
