A theory requires mathematics, and machine learning theory is no exception. But, as this is intended to be only a simple introduction, we will not be delving too deep into the mathematical analysis. We'll focus more on the intuition of the theory with a sufficient amount of math to retain the rigor.

Machine Design there is taught in a two-course sequence. Machine Design I teaches the kinematics and kinetics of mechanisms, i.e. linkages, cams, shafts, etc. Once you can analyze the dynamics of a mechanism throughout its motion, you can then use that information to design the members of a mechanism to withstand the incurred stresses of operation, and select the correct components to make the machine function.
