1. Introduction. It is estimated that the worldwide market in business intelligence and analytics will be worth \$200 billion by 2020, up from \$130 billion in 2016 (). Much of this growth is driven by data (Chen, Chiang, & Storey, 2012). Large scale corporate databases, mobile-apps, web analytics data, social media, and sensor data, all contribute to what is commonly referred to as "information ...

In statistics, ordinary least squares (OLS) is a type of linear least squares method for estimating the unknown parameters in a linear regression model. OLS chooses the parameters of a linear function

of a set of explanatory variables by the principle of least squares: minimizing the sum of the squares of the differences between the observed dependent variable (values of the variable being ...
