The world behind a simple shirt, in five chapters. The U.S. has perfected cotton by treating it as a high-tech product. Genetically modified crops are controversial, but not among U.S. cotton farmers: Roughly 90 percent of U.S. cotton comes from genetically modified seeds that were designed in labs to produce more cotton and resist pests. And when it's time to harvest the cotton, U.S ...

Alan Turing reduced the problem of defining intelligence to a simple question about conversation. He suggests that: if a machine can answer any question put to it, using the same words that an ordinary person would, then we may call that machine intelligent. A modern version of his experimental design would use an online chat room, where one of the participants is a real person
