III. Solve the following quadratic equations by factoring and using the Zero-Product Property. You must show all work. Failure to show proper work and to maintain each line to 0 will result in lost points. Place your final answer in complete form in the space provided. A complete form of an answer includes a variable and a value such as $x = \underline{\hspace{1cm}}$.

When solving quadratic equations in general, first get everything over onto one side of the "equals" sign (something that was already done in the above examples). Then first check to see if there is an obvious factoring or if there is an obvious square-rooting that you can do. If not, then it's usually best to resort to the Quadratic Formula.
