Good timing! I was just about to post a question about this myself - being new to the world of SSDs. I've just bought the Samsung 840 Evo 250GB for my old household PC after being amazed by the performance of a "cheap" 60GB Kingston SSD drive we bought to test in work.

**[SOLVED] SSD partitioning- is reserve space necessary ...**

The default allocation unit size recommended when formatting a drive in our current set-up is 4096 bytes. I understand the basics of the pros and cons of larger and smaller sizes (performance boost vs. space preservation) but it seems the benefits of a solid state drive (seek times massively lower than hard disks) may create a situation where a much smaller allocation size is not detrimental.
