Sexual selection is Darwin's second great insight, and he defined it as depending on "the advantage which certain individuals have over other individuals of the same sex and species solely in respect of reproduction". So sexual selection can be thought of as intra-specific reproductive competition.

What is a minority group? Thomas & McDonell (1995) define a minority group as “a section of society whose identity is determined by cultural properties not shared by all members of the society and whose needs are not necessarily served when the needs of the society as a whole are being served” (p. 185). By definition, they add, “minority markets are too small to be self-sustaining for ...
