The load line diagram at right is for a resistive load in a common emitter circuit. The load line shows how the collector load resistor (R_L) constrains the circuit voltage and current. The diagram also plots the transistor's collector current I_C versus collector voltage V_{CE} for different values of base current I_{base} . The intersections of the load line with the transistor characteristic ...

In electronics, diode modelling refers to the mathematical models used to approximate the actual behaviour of real diodes to enable calculations and circuit analysis. A diode's I-V curve is nonlinear (it is well described by the Shockley diode law). This nonlinearity complicates calculations in circuits involving diodes so simpler models are often required.

A Variety of Other Applications: Clamp; Also called a "dc restorer" in Sedra & Smith "When a signal drives an open-ended capacitor the average voltage level on the output terminal of the capacitor is determined by the initial charge on that terminal and may therefore be quite unpredictable."

L3 Autumn 2009 E2.2 Analogue Electronics Imperial College London – EEE 3 • Keep all the properties of the ideal op-amp except that the op-amp now has a finite gain G . (G may be complex, or a function of frequency!) • The network connecting the output and the input is an ideal voltage divider (since both $Y_{in}=0$ and $Z_{in}=0$) with gain $H=R_1/(R_1+R_2)$ from output to input.

As part of our innovation efforts this year, we are inviting the defence and unmanned aerial vehicles sectors to a combined one-day event. Participants may choose among discussions about defence and unmanned aerial vehicles in the morning; workshops and/or B2B sessions in the afternoon.

The circuit is simulated in the Cadence Virtuoso tool of the gpdk180 nm CMOS process. The length and width ratios of MOS transistors available for the internal structure of VDTA are presented in Table 1. Fig. 3 shows the supply rail voltage of ± 0.9 V and the biasing current of 150 μ A ($I_{B1} = I_{B2} = I_{B3} = I_{B4}$). An input square wave of amplitude 1 V, frequency of 1 kHz is applied to the ...
