Diver communications are the methods used by divers to communicate with each other or with surface members of the dive team. In professional diving, communication is usually between a single working diver and the diving supervisor at the surface control point. This is considered important both for managing the diving work, and as a safety measure for monitoring the condition of the diver.

Diver communications - Wikipedia

The SLC-32 (Signal Logic Controller) is so named because it provides 3 aspect indications (with approach) for both directions. A detection circuit is also built into the card, with optional configurations for current detection, optical sensing, CTs, or external inputs as provided by other detection methods, such as "Check In - Check Out".
