Blinn was established as Mission Institute in 1883 by the Southern German Conference of the Methodist denomination. It became coeducational in 1888 when it began admitting women. In 1889, the institute's name was changed to Blinn Memorial College in honor of the Reverend Christian Blinn of New York, who had donated a considerable sum of money to make the school possible.

In general, polymers with a R_2SiO unit are termed silicones, while the SiO repeat unit is also called siloxane. The strength of the SiO bond gives the polymer its thermal and chemical stability, which is important for its use in high-temperature applications [1,2]. In PDMS, the flexibility of the siloxane backbone permits the chains to easily arrange and rearrange themselves so as to place ...

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...
