A genealogical DNA test is a DNA-based test which looks at specific locations of a person's genome, in order to find or verify ancestral genealogical relationships or (with lower reliability) to estimate the ethnic mixture of an individual. Since different testing companies use different ethnic reference groups and different matching algorithms, ethnicity estimates and more distant DNA matches ...

Genealogical DNA test - Wikipedia

Cytogenetics is the branch of genetics that studies the structure and behavior of chromosomes and their relation to human disease and disease processes.
