Technology means progress. That's what we've been told ever since Ted Technology, inventor of Technology, invented the first Technology. Well, I'm here to tell you, folks: Ted had a lot of virtues -- good friend, brilliant with machines, dong like an active fire hose -- but the man was a pathological liar.

5 Simple Problems Technology Should Have Fixed by Now ...

In this final section of the Solving chapter we will solve inequalities that involve absolute value. As we will see the process for solving inequalities with a $<$ (i.e. a less than) is very different from solving an inequality with a $>$ (i.e. greater than).

A circle is the set of points in a plane that are equidistant from a given point O. The distance r from the center is called the radius, and the point O is called the center. Twice the radius is known as the diameter $d=2r$. The angle a circle subtends from its center is a full angle, equal to 360 degrees or 2π radians. A circle has the maximum possible area for a given perimeter, and the ...

IXL - New York sixth-grade math standards

Single-use zoning, also known as Euclidean zoning, is a tool of urban planning that controls land uses in a city. The earliest forms of single-use zoning were practiced in New York city in the early 1900s, to guide its rapid population growth from immigration. Land uses were divided into residential, commercial and industrial areas, now referred to as zones or zoning districts in cities.

2015 Solution: `forEach`. With the relatively widespread availability of the `Array.prototype.forEach` function (in 2015), it's worth noting that in those situations involving iteration primarily over an array of values, `.forEach()` provides a clean, natural way to get a distinct closure for every iteration. That is, assuming you've got some sort of array containing values (DOM references, objects ...
