Any student of geology in any university in the world learn during its degree the relationship between the real dip and the infinite apparent dips that a plane contains. Most of students learn how to calculate a real dip from a couple of apparent dips or, inversely, how to work out an apparent dip given the real dip and another direction using the stereonet.

Perhaps to put what David has said (very well) in another way - rocks are subjected to forces that act on them and these forces cause strain (which is change in shape and volume of the rock).

### **What is the concept of three principal stresses in rock ...**

Not even 24 hours have passed since the deadly 8.9 Mw earthquake in Honshu, Japan, and already conspiranoics, cranks and even some broadcasters are opening the door of the panic room in the internet: Are we having more earthquakes now than some years ago? Is the end of the world approaching? Is Gaia trying to get rid of us? The answer to all these questions is a big NO.
