Psychotherapy is the use of psychological methods, particularly when based on regular personal interaction, to help a person change behavior and overcome problems in desired ways. Psychotherapy aims to improve an individual's well-being and mental health, to resolve or mitigate troublesome behaviors, beliefs, compulsions, thoughts, or emotions, and to improve relationships and social skills.

The Rationale for Family Therapy. In the early part of the 20th century, the psychologist Carl Jung noted that children tend to live out the unconscious conflicts of their parents. And, as Family Systems Theory teaches, all too often a child will be marked as a “problem,” the “scapegoat” or “black sheep” of the family—the Identified Patient, in Family Systems language—when ...

Material-Group-Therapy | ABOUT RECOVERY

Mental health therapists in the past dealt mostly with psychological diseases and the health issues that came from it. Their focus was less on individual factors like motivation, positive thinking, happiness, and emotional resilience, and more on the manifested symptoms of mental illness.

The Connections Between Positive Psychology And Mental Health

What was really needed was a fundamental change in our attitude toward life. We had to learn ourselves and, furthermore, we had to teach the despairing men, that it did not really matter what we expected from life, but rather what life expected from us. We needed to stop asking about the meaning of life, and instead to think of ourselves as those who were being questioned by life - daily and ...
