Match the description provided about the behavior of a cart along a linear track to its best graphical representation. Remember that: velocities are positive when the graph is in I quadrant I ; velocities are negative when the graph is in quadrant IV ; velocity-time graphs sloping towards the x-axis represent losing speed; velocity-time graphs sloping away from the x-axis represent gaining speed

Every time you get in your car, you witness differentiation first hand. Your speed is the first derivative of your position. And when you step on the accelerator or the brake — accelerating or decelerating — you experience a second derivative. If a function gives the position of something as a function of time, the [...]

a Thread a length of ticker-tape through a ticker-timer and attach the end to a trolley.. b Pull a trolley with a fixed force along a bench. Loop one end of the elastic cord around a rod attached to the trolley. Keep the force constant by making sure that the cord is always stretched by the same amount as the trolley moves.

We have observed that an increase in the tension of a string causes an increase in the velocity that waves travel on the string. In this activity we will examine the precise relationship between tension (T) the force applied to the string, the wave speed (v w) and the linear mass density of the string ($\mu = m/L$ which is measured in kg/m).

Students build their own small-scale model roller coasters using pipe insulation and marbles, and then analyze them using physics principles learned in the associated lesson. They examine conversions between kinetic and potential energy and frictional effects to design roller coasters that are completely driven by gravity.

What rocket designers really want is an engine with both high thrust and high specific impulse. Such engines don't have to use weak Hohmanns, they can use fantastically expensive (but rapid) Brachistochrone trajectories. Such engines are called "Torch Drives", a spacecraft with a torch drive is called a "Torchship."The term "Torchship" was coined by Robert Heinlein in 1953 for his short story ...
