BEST ANSWER: The reason for the bed frame is that people vary in size from a tiny 80 pound wisp of a lady to a man weighing in excess of 300 pounds with corresponding differences in body thickness. The bed frame is vertically adjustable. Without a bed frame a slight person would likely be deep inside the casket instead of being at the level of the rim of the casket.

Purplemath. Solving proportions is simply a matter of stating the ratios as fractions, setting the two fractions equal to each other, cross-multiplying, and solving the resulting equation. The exercise set will probably start out by asking for the solutions to straightforward simple proportions, but they might use the "odds" notation, something like this:

Preprocessor Overview. The C preprocessor, often known as cpp, is a macro processor that is used automatically by the C compiler to transform your program before compilation. It is called a macro processor because it allows you to define macros, which are brief abbreviations for longer constructs. The C preprocessor is intended to be used only with C, C++, and Objective-C source code.
