Assisted reproductive technology (ART) are medical procedures used primarily to address infertility. It includes procedures such as in vitro fertilization. It may include intracytoplasmic sperm injection (ICSI), cryopreservation of gametes or embryos, and/or may involve the use of fertility medication. When used to address infertility, it may also be referred to as fertility treatment.

### **Assisted reproductive technology - Wikipedia**

In general, infertility is defined as not being able to get pregnant (conceive) after one year (or longer) of unprotected sex. Because fertility in women is known to decline steadily with age, some providers evaluate and treat women aged 35 years or older after 6 months of unprotected sex.
