Chemistry with Lab - Easy Peasy All-in-One High School

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Chemistry - Wikipedia

What Is DNA? Scientists have discovered an unmistakable language within all living things. Like a miniature library, DNA stores piles of information in extraordinary molecules that specify the details of everything from the shape of flower petals to the color of your eyes.

Genetics | Answers in Genesis

What is matter? Matter is everything around you. Atoms and compounds are all made of very small parts of matter. Those atoms go on to build the things you see and touch every day. Matter is defined as anything that has mass and takes up space (it has volume).
