Palatine Group is a recognized leader and innovator of experiential learning programs for project leadership, project and program management, and strategic business management that help our clients build global competencies and high performance.

Palatine Group
A simulation is an approximate imitation of the operation of a process or system; the act of simulating first requires a model is developed. This model is a well-defined description of the simulated subject, and represents its key characteristics, such as its behaviour, functions and abstract or physical properties.

Simulation Modeling v/s Spreadsheet Analysis. Use of spreadsheets is very common in analyzing data and creating "what- if" scenarios. Although spreadsheets are very useful and a powerful tool for analyzing data and creating forecasts, use of simulations provides a distinct advantage when trying to model and predict the behavior of complex programs and business scenarios.
